

FANCY COLOUR DIAMONDS

“

Fancy colour diamonds are special products of nature that are something different and so unique that there are very few of them and those who possess them own something very special. They have a fire and a brilliance that matches no other gemstones! As a Certified Gemmologist Appraiser, American Gem Society (AGS), I love the pinks and purples and their combinations of other colours mixed within them. Since no two are alike, it is an adventure to find the one you love the best.
